Present at Site Paul Purser, DBA

Observations I arrived on site, entering at building D. I noted paint work at door Jambs here.

Walking around to the back of the property, I noted roofers at work on Building B. Roofing demo was ongoing.

I entered Building A where I saw that paint work has been performed at hallway walls. Gas heaters in this area have also been removed.

I called the superintendent, Walt Swider, KT (who was at lunch) to discuss some items about the project, specifically about a gas smell in Building A and some paint notes. He cleared these items up for me and said that gas has been turned off to the property (the smell probably coming from the roofing work in the back).

Items to Verify None

Action Required None
