Work in Progress	Foundation Work – Formwork
Present at Site	Foundation Crew AOC Meeting Participants Paul Purser, DBA
Observations	I arrived prior to out monthly meeting and walked site. I noted no major changes in the East section of the upper building. Moving westward, I saw that Foundation Waterproofing had begun. A base layer had been applied to the foundation concrete wall up to 8 feet on the east (dirt) side. A large amount of form work was still in place and currently being removed.
