Observations I arrived on site prior to our monthly OAC meeting to walk the site. Work is progressing nicely. I am concerned that block has not started in the High School but have been told that it is forthcoming. Materials for that work are staged and ready to go.

Demo has been performed throughout including Asbestos Abatement. Ceilings have been removed everywhere except for the HS toilet room which is not slated for work until the summer. Excavation is underway at the Junior High and moving along according to schedule.

After our meeting, we walked the site. 2 items of work are under review and need further discussion prior to continuation: the ADA ramp at the Middle School & the Ceiling and lighting work at the Junior High.

Items to Verify None.

Action Required None.
